PRESENTED IS A STATISTICAL SUMMARY OF THE FIRST-YEAR ACTIVITIES OF PROJECTS FOR EDUCATIONALLY DISADVANTAGED CHILDREN FUNDED UNDER TITLE I OF THE 1965 ELEMENTARY AND SECONDARY EDUCATION ACT. DETAILED TABULAR DATA ARE GIVEN FOR PROJECTS IN THE 50 STATES: DISTRICT OF COLUMBIA, AND THREE TERRITORIES. SELECTED DATA ARE INCLUDED FOR 32 LARGE CITIES. OF THE \$1.19 BILLION FUNDED FOR TITLE I PROJECTS FOR THE FISCAL YEAR 1966, \$987.6 MILLION WAS EXPENDED. PROGRAMS FOR DISADVANTAGED CHILDREN WHICH WERE OPERATED BY LOCAL EDUCATIONAL AGENCIES (LEA) WERE ALLOCATED \$1.16 BILLION, OF WHICH \$970 MILLION WAS SPENT. PROGRAMS FOR HANDICAPPED CHILDREN WHICH WERE OPERATED BY STATE AGENCIES RECEIVED \$15.9 MILLION AND SPENT ABOUT \$11.2 MILLION. ABOUT \$6.5 MILLION WAS SPENT OF THE \$12.5 MILLION ALLOCATED FOR STATE ADMINISTRATION OF TITLE I PROJECTS. OF THE APPROXIMATELY 8.3 MILLION CHILDREN WHO PARTICIPATED IN THE FIRST-YEAR TITLE I PROJECTS, 60 PERCENT WERE ENROLLED IN ELEMENTARY SCHOOL, AND 6 PERCENT WERE NONPUBLIC SCHOOL CHILDREN. ABOUT 200,500 NEW TEACHING POSITIONS, TWO-THIRDS OF WHICH WERE FOR THE ELEMENTARY GRADES, WERE REQUIRED TO OPERATE TITLE I PROJECTS. IN ADDITION, ABOUT 181,200 OTHER STAFF POSITIONS WERE REQUIRED. A TOTAL OF 22,000 PROJECTS WERE OPERATED BY 17,500 SCHOOL DISTRICTS. ALMOST 7D PERCENT OF THESE PROJECTS HAD READING OR ENGLISH COMPONENTS. EXTENSIVE TABLES OFFER INFORMATION ABOUT EXPENDITURES, ENROLLMENT, AND STAFF IN THE VARIOUS PROGRAMS. (LB)

STATISTICAL REPORT

Elementary and Secondary Education Act of 1965

HIGHLIGHTS

Entitlements. For fiscal year 1966, Title I entitlements totaled \$1.19 billion. Of this amount, \$1.16 billion was allocated for programs operated by local educational agencies for disadvantaged children; \$15.9 million for programs administered by State agencies for handicapped children; and \$12.5 million for State administration of the Title I program.

Expenditures. A total of \$987.6 million was expended the first year. This amount included nearly \$970 million spent by local educational agencies; about \$11.2 million by State agencies for programs for handicapped children; and nearly \$6.5 million by States for administration costs.

Participating Children. Approximately 8.3 million children participated in Title I programs during the first year of operation. Included in that number were nearly 527,000 non-public school children, approximately 6 percent of the total. About 60 percent of all children participating were enrolled in grades 1 through 6.

Staff. About 381,700 new staff positions were required to operate Title I projects. These included 200,500 teaching positions. Approximately, two-thirds of the teaching assignments were for the elementary grades.

Projects and School Districts. More than 22,000 projects were operated by 17,500 school districts during fiscal year 1966. Almost 70 percent of the projects included reading or English components.

STATISTICAL REPORT

THE FIRST YEAR OF TITLE I

ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

Division of Compensatory Education-John F. Hughes, Director Bureau of Elementary and Secondary Education • Office of Education U.S. Department of Health, Education, and Welfare

FOREWORD

This report presents a statistical summary of the first-year programs for educationally disadvantaged children funded under Title I of the Elementary and Secondary Education Act of 1965.

Major points of interest are highlighted. Detailed data are shown for the 50 States, the District of Columbia and the outlying areas. In addition, selected data are included for 32 big cities.

Nuch of the data included in this presentation was furnished by the local educational agencies in a **yearend** statistical report. The Office of Education acknowledges with thanks their cooperation.

INTRODUCTION

Congress hereby declares it to be the policy of the United States to provide financial assistance to local educational agencies serving areas with concentrations of children from low-income families in order to expand and improve their educational programs by various means—which contribute particularly to meeting the special educational needs of educationally deprived children.

-- Elementary and Secondary Education Act of 1965 (PL 89-10)

This is a Statistical Report on the first year of the Title I program, fiscal year 1966. It includes statistics on funds, children, and staff. Most of the data were furnished by local educational agencies in response to an Office of Education questionnaire. (See Appendix.) Expenditure data were supplemented by the Title I annual financial report.

ERIC

FUNDS

Entitlements

Total Title I entitlements for all purposes amounted to \$1.19 billion for the first year of the program. Included in this total were entitlements of \$1.16 billion, or 97.6 percent, for projects operated by local educational agencies (LEAs); \$15.9 million, or 1.3 percent, for State programs for handicapped children; and \$12.5 million, or 1.1 percent, for State administration of the Title I program. (See table 1.)

Expenditures

Total expenditures for fiscal year 1966 Title I activities amounted to \$987.6 million, or nearly 83 percent of all entitlements. (See tables 2 and 3.) Funds expended by local educational agencies totaled \$969.9 million, or 98.2 percent of all expenditures. State programs for handicapped children accounted for \$11.2 million, or 1.1 percent of the total amount, and State administration of Title I, the remaining \$6.5 million, or less than 1 percent. Forty-one States and the District of Columbia, or about four out of five States, expended 70 or more percent of their Title I entitlements. (See table 3.)

The percents of funds expended and numbers of States, including the District of Columbia, were distributed as follows:

Percent of funds expended Number of States																
90.0-99.9 80.0-89.9	•		•	•		•	•							_	_	18
70.0-79.9 60.0-69.9			•	•	•	•			•	•						13
59.9 or le	ss .		•	•	•	•	•	•	•	•	•	•	•	•	•	2
<u>Mean83</u> po	erce	ent								Me	<u>ed</u> i	i ai	ոլ	<u>_</u>	B2	percent

^{1/} Computed from grouped data.

On a regional basis, expenditures as a percent of entitlements ranged from only 63 percent for the New England region to more than 90 percent for the Mideast. (See tables 4 and 5.) For the eight geographic regions within the United States, expenditures—ranked as a percent of entitlements—were as follows:

R	<u>legion</u>											as	5 6	enditure percent of
												<u> </u>	201	itlements
M	ideast .	•	•		•	•	•							.90.5
2	outnwest	•	•	•	•	•	•	•	•	•	•	•	•	.86.8

R	ocky Moun	ta	in		•			•						.83.1
2	outneast	•	•	•	•	•	•	•	•					.82.2
G	reat Lake	S	•	•	•	•	•	•	•	•	•	•	•	.77.5
	lains .	•.												.75.6
N	ew Englan	d	•	•	•	•	•	•	•	•	•	•	•	.62.8

The variations in State and regional expenditures reflect such factors as late funding and insufficient staff and facilities.

Expenditures for project operation. Tables 6 and 7 present data on Title I expenditures by purpose, based on financial records. Of the total funds almost \$873 million, or 90 percent, was expended for project operation. Of this amount, over \$500 million, or 57 percent, was for instruction. Equipment and minor remodeling costs amounted to \$220 million, or 25 percent of the operational costs. The remaining amount included about \$32 million for administration of local programs, approximately \$22, million for health services and \$21 million for food services.

Expenditures for project activities. Of the total amount expended for project operation the first year, about four-fifths, or \$778 million, represented instruction and service activities for participating children. (See table 8). The largest Title I investment, \$560 million, was for instructional activities. Of this amount, approximately \$246 million, or 44 percent, was designated for reading, English language, arts, and English as a second language. Of the \$218 million reported for service activities, more than one-half was expended for (1) text books, supplies and materials and (2) library books and services. Expenditures for these two service areas amounted to about \$65 and \$45 million, respectively. (See tables 9 and 10.)

Tables 11 and 12 present activity expenditures by grade spans. As might be expected most of the funds were for programs serving children in the lower grades. About 60 percent of the total expenditures for both instructional activities and service activities represented programs involving children in grades 1 through 6. Variations in the relative amounts of expenditures for the grade spans for individual instructional and service activities principally reflect the nature of the activities. For example, most of the funds expended for industrial arts and vocational training were for programs involving youngsters in grades 7-12.

Average expenditures per child. The Title I average expenditure per child nationally was \$119 for the first year of the program. However, the average per child expenditure varied greatly from State to State and from program to program, ranging from a low of \$31 in Hawaii to a high of \$233 in California. (See tables 13 and 14.)

The average expenditures per child and numbers of States, including the District of Columbia, were distributed as follows:

Average expen	di	tu	re										N	lumber
per chil	d											•	of	States
\$200 or more	•		•	•	•	•		•	•	•		•		3
\$150 - \$199	•		•	•		•			•		•	•	•	14
\$100 - \$149	•			•		•			•		•	•	•	19
\$ 50 - \$ 99	•	•	•	•	•	•	•		•			•	•	14
\$ 49 or less	_		_				_		_	_	_	_		1

Expenditures for summer programs. Almost one-fourth, or \$236 million, of the total funds expended for Title I projects during the first year was for programs conducted during the summer of 1966. (See tables 15 and 16.) The percent of total expenditures used by the States for summer activities ranged from about 4 percent in Oklahoma to approximately 60 percent in Rhode Island.

PARTICIPATING CHILDREN

Over eight million children participated in the regular and summer term programs funded under Title I the first year. More than 526,000, or about 6 percent, of these children were enrolled in nonpublic schools and over 176,000, approximately 2 percent, were not enrolled in any school. The latter were mainly high school dropouts and preschool children. (See tables 17 and 18.)

Paralleling the distribution of funds, about 60 percent of the children participating in Title I activities—both nationally and in large cities—were in grades 1 through 6. These children were divided almost evenly between programs for grades 1 through 3 and 4 through 6, with 2.44 and 2.43 million participating children, respectively, in these two grade spans. (See tables 19, 20, and 21.)

The fact that American educators are very much concerned about the reading problems of disadvantaged children is reflected in the large proportion of youngsters participating in reading and English language activities and receiving books and library services. More than one-half of the 8.3 million children benefiting from Title I the first year participated in programs which included reading or English language components. Over one-half also received books, supplies, and materials while two-fifths benefited from library services. In addition to general remedial or compensatory education two other areas involving a relatively large proportion of the children were enrichment and health activities. Each of these had over 2 million participants. (See tables 22 through 25.)

Title I summer programs involved 2.7 million children. (Some of these children had also participated in Title I activities during the regular school year.) As in the overall program, more than one-half of the participants in summer programs were in grades 1 through 6. (See tables 26 and 27.)

The 8.3 million children who participated in Title I programs the first year represented about one-sixth of the total U.S. day school enrollment for 1965. (See table 28.)

The numbers of children on which the State entitlements were based for the first year are presented in table 29. (See page <u>68</u> for the formula used to determine State entitlements.)

STAFF

Title I projects in operation during the first year created 381,700 new staff positions on a full-time, part-time, regular or temporary basis. Professional staff assignments accounted for more than two-thirds of all the positions filled, with more than one-half the total being teaching assignments. About 60 percent of the 200,000 teaching positions were for elementary school teachers, which reflects the concentration of services on children in grades 1 through 6. About 63 percent of the 116,700 nonprofessional staff positions filled were for teacher aides. About 85 percent of the teachers and 56 percent of the aides received inservice training. (See tables 30 through 34.)

More than 20,000 staff positions budgeted for Title I projects were not filled. Nearly one-third of these unfilled positions were for elementary school teachers. (See table 35.)

PROJECTS AND SCHOOL DISTRICTS

Over 22,000 projects were operated by approximately 17,500 school districts during the first year of the Title I program. It should be noted, however, that the composition of projects varied somewhat from place to place. In some areas several activities were represented in one comprehensive project, while in others separate activities were represented in individual projects. Also, in some instances, two or more school districts may have cooperated in operating a single project for their disadvantaged children.

Numbers of projects were concentrated as were funds and numbers of children, in the area of reading and English language. Almost 70 percent of the projects included reading or English components and nearly 60 percent provided books and supplies. (See tables 36 through 38.)

STATE PROGRAMS FOR HANDICAPPED CHILDREN (PL 89-313)

Entitlements under Public Law 89-313 to State agencies directly responsible for educating handicapped children amounted to \$15.9 million for fiscal year 1966. There were more than 65,000 children, more than one-half of whom were mentally retarded, in attendance in schools conducting these programs. (See tables 39 through 43.)

Expenditures for these State administered programs for handicapped children amounted to \$11.2 million the first year. The major portion of the funds went for instruction, approximately 35 percent, and equipment, nearly 41 percent. (See table 44.)

		<u> </u>					

Designation of funds by instructional and service activity was estimated by reporting local educational agencies since fiscal records are not maintained by such activities.

Excludes \$23,908,720 for in-service training of staff and \$97,335,383 for construction, and \$70,577,891 for other items such as mobile classrooms, educational television, and equipment not easily classified or directly related to one of the listed activities.

Includes curriculum development, health education, certain preschool readiness programs, tutoring and after school study programs, special programs for dropouts and gifted children and other instructional activities not easily classified.

Includes parental involvement, community services, student body activities, and other services not easily classified.

NOTE. - Excludes \$11,165,689 expended for State programs for handicapped children under Public Law 89-313, and \$6,495,758 expended for State administration.

^{1/} State entitlements for fiscal year 1966 were based on the number of children aged 5 to 17 in families with incomes less than \$2,000 a year (1960 Census) and those in families receiving more than \$2,000 a year (1962) in aid to families with dependent children (AFDC). (See page 68 for the formula used to determine State entitlements.)

^{2/} Two percent of total estimated State entitlements was withheld for the outlying areas (American Samoa, Guam, Puerto Rico, Trust Territory, and Virgin Islands).

STATE PROGRAMS FOR HANDICAPPED CHILDREN (PL 89-313)

The Public Law 89-313 amendment to Title I of the Elementary and Secondary Education Act authorized grants to all State agencies directly responsible for the free public education of handicapped children. Such agencies include departments of education, health, welfare, mental health and mental hygiene; State boards of control; and others. The education may be provided in State operated schools such as residential schools for the blind, deaf, or mentally retarded, or in schools supported by State agencies directly responsible for some or all of the children enrolled.

APPENDIX

FORMULAS FOR DETERMINING STATE ENTITLEMENTS

Public Law 89-10. - The State entitlements under Title I for the fiscal year 1966, were based on the number of children aged 5 through 17 from low-income families in eligible school districts. Eligibility of the districts was determined by the U.S. Commissioner of Education on the basis of data provided by the Bureau of the Census.

The formula for computing these maximum basic grants incorporated three factors:

- A. The number of children aged 5 through 17 from families with an annual income of less than \$2,000.
- B. The number of children aged 5 through 17 from families with incomes exceeding \$2,000 in the form of aid to families with dependent children under Title IV of the Social Security Act.
- C. One-half the average per pupil expenditure in the State for the second year preceding the year for which the computation was made.

Formula: $(A + B) \times C = \text{amount of State entitlement.}$

Public Law 89-313. - The State entitlements under the amended Title I for the fiscal year 1966, were based on the number of children in average daily attendance at schools for the handicapped operated or supported by a State agency, multiplied by one-half the average per pupil expenditure in the State for the year preceding the year for which the computation was made.

FORMULAS FOR DETERMINING STATE ENTITLEMENTS - continued

State Administration. - State educational agencies received Federal funds for expenditures required to administer Title I programs, including technical assistance for evaluation, not exceeding:

- 1. One percent of the total
 entitlements to local
 educational agencies of
 the State, or
- 2. \$75,000, (\$25,000 in the case of other areas)

whichever was greater.

ERIC Full Tox t Provided by ERIC

ELIGIBILITY OF LOCAL EDUCATIONAL AGENCIES

The U.S. Commissioner of Education determined the eligibility of local educational agencies for the first year of Title I on the basis of data provided by the Bureau of the Census. In addition, compliance with Title VI of the Civil Rights Act of 1964 was required of all local educational agencies submitting applications under Title I.

The basis for determining eligibility of local educational agencies was the numbers of children aged 5 to 17, as shown on the 1960 census, who were from families with incomes of less than \$2,000 a year. The Act provided that eligibility be determined on a school district basis, if satisfactory d ta were available. When satisfactory data were not available on a district basis—as was the case for the year 1965-66—a'l local educational agencies in a county were considered eligible which had at least 100 such children.

If the district of a single local educational agency was coterminous with a county with less than 100 such children, and if not less than 3 percent, and at least 10, of the children 5 to 17 were from families with incomes of less than \$2,000 a year, then the local educational agency would be eligible. If, however, more than one school district was contained in such a county, the State educational agency was to supply to the U.S. Commissioner of Education adequate information concerning the boundaries of these districts; then the Commissioner determined the eligibility of each district, using the same criteria used for a countywide district.

TECHNICAL NOTES

This section of the report describes the universe, the sample design and the sample selection procedures, the response rates, the method of estimation, and the sampling and nonsampling errors in the yearend statistical survey.

The universe of inquiry consisted of the 11,104 public local educational agencies (LEAs) in the United States, the District of Columbia, and the 5 outlying areas with enrollment of 300 or more students that participated in the Title I program during fiscal year 1966. These LEAs cor rise about 97 percent of the total public school enrollment.

A one-stage stratified sample was used. The LEAs were stratified by State and by enrollment size within the State. The number of LEAs in the sample for a particular State was determined by the sample size needed to obtain the specified precision at the 2 sigma confidence level. Where more than one stratum was required, the strata boundaries were set up in such a manner that the aggregate enrollment within each stratum was approximately equal. In most of the States two strata were required; three strata were used in California, New York and Ohio. Table 1 shows the enrollment sizes that were used for strata boundaries in each of the States.

Within each of the States the LEAs were ranked in descending order according to enrollment size. All the LEAs that fell within the first stratum were selected in the sample with certainty. In the other strata the LEAs that fell in the sample were selected in a systematic manner after a random start. For example, in Alabama there were 112

LEAs in the universe. (See table 2). Eleven of these LEAs had enrollments of 12,000 or more students. These 11 LEAs were put in Stratum I and the other 101 LEAs in Stratum II. The 11 LEAs in Stratum I were selected with certainty (a sampling ratio of 1:1). In Stratum II a sampling ratio of 1:2 was used to select the LEAs that were to fall in the sample, that is, 51 out of 101. The number of LEAs in the universe and the number in the sample for each stratum is shown in table 2. The number of respondents is also shown in this table. The sampling ratio and the response rate for each stratum is shown in table 3.

The response rate for the nation as a whole was very satisfactory, 87.6 percent. In fact, except for a few States, the response rate from the individual States was excellent.

Because of the high response rate and because of the absence of relevant data on which to base adjustment for instrument nonresponse, the LEAs that had not responded were assumed to have the same program characteristics as the responding LEAs in their respective stratum. The sampling ratios were then adjusted to provide for instrument nonresponse. To illustrate: In Stratum II of Alabama 51 questionnaires were mailed out and 46 LEAs completed and returned the questionnaire. The sample would no longer consist of 51 out of 101 LEAs (a sampling ratio of 1:2) but of 46 out of 101 (a sampling ratio of 1:2.2). If the original sampling ratio was used to obtain population estimates from the sample data, then, these estimates would, on the average, be too low. To correct for this effect, the sampling ratio for each of the strata was recomputed as the ratio of useable returns to the total number of LEAs in the stratum. It seems unlikely that this procedure for the treatment

of instrument nonresponse is a source of serious bias at the national level or in most of the States. However, in those States where a lower proportion of LEAs responded there may be a higher nonresponse bias.

The estimation procedure that was used to develop the statistics in this survey consisted of inflating the sample data by an inflation factor that was the inverse of the probability by which the LEA was selected to fall in the sample and then adjusting this factor to account for nonresponse as described above.

Since the estimates are based on a sample, they may differ somewhat from the figures that would have been obtained if a complete count of all the LEAs in the universe had been taken using the same questionnaire, instructions and procedures. As in any survey work the results are subject to errors of response and of reporting as well as sampling variability.

Sampling error is one component of the total error of a survey. The major types of nonsampling errors in this report are errors due to biases in the responses, errors introduced by imputations, and errors introduced in the coding and other processing of the questionnaires. For estimates of totals representing relatively small proportions of the population, the major component of the total survey error tends to be the sampling error. As the estimated totals approach the level of the total population, the sampling error decreases relative to the size of the estimate. This is not necessarily true of the nonsampling errors, and they tend to assume a relatively larger role in the total survey error.

ERIC

The reliability of the estimates made from sample data can be measured by the standard error which is used to determine confidence limits around the sample estimate; that is, the standard error is primarily a measure of the variations that occur by chance because a sample rather than the whole of the population is surveyed. The chances are about 68 out of 100 that an estimate from the sample would differ from a complete census figure by less than the standard error. The chances are 95 out of 100 that the difference would be less than twice the standard error. The standard error also partially measures the effect of response errors but does not measure any systematic biases in the data.

The precision of sample estimates can also be measured in relative terms by the use of the coefficient of variation which is equal to the standard error of the estimate divided by the value being estimated. The coefficient of variation for the estimated number of children participating at the national level is 1.2 percent.

26 OPTIONAL - BRIEFLY DESCRIBE WHAT YOU CONSIDER TO BE THE OUTSTANDING FEATURES AND ACCOMPLISHMENTS TO THE 1966 TITLE I PROGRAM IN YOUR SCHOOL DISTRICT. (If more space is needed, attach additional sheet and identify by LEA name in upper right hand corner.)

INSTRUCTIONS FOR 1965-66 STATISTICAL REPORT

LOCAL EDUCATIONAL AGENCY'S STATISTICAL REPORT OF TITLE I PROGRAM ACTIVITIES ESEA-P.L. 89-10

General Information

The Office of Education needs certain statistical information from local educational agencies, concerning the Title I activities actually performed for the past year. Your agency is one of a sample of the local educational agencies selected to provide this information.

The information requested covers the entire Title I — ogram administered by the LEA including the project activities and services for which 1966 funds were expended or obligated. Only one report will be requested from each (LEA) Title I applicant in the sample regardless of the number of separate projects. Summer school activities carried on under Title I are also to be included. Report numbers of children, expenditures, and other items of information for all of Title I program activities including those administered by your LEA in cooperation with other local educational agencies.

Since your agency is one of a limited sample of LEA's selected to provide this information for your State the report should be completed as accurately as possible.

DETAILED INSTRUCTIONS FOR EACH ITEM OF INFORMATION

- Item 1 File Control No. Do not make entry here. This number has been established by U.S. Office of Education for identification and data processing purposes.
- Items 2 through 10 Name and Other LEA Identification Enter in items 2-10 the name and other identifying information of the local educational agency preparing this report.
- Item 11 Total Number of Children Who Participated in Title I Program by Enrollment and Grade Span Enter the total number of children who participated in Title I program for both regular and summer school term projects for fiscal year 1966. The number of "children not enrolled in any school" should be allocated to the various grade spans according to their ages. Count each child once regardless of the number of different project activities or services in which he may have participated.

Item 12 - Total Resident Children by Enrollment (1965-66)

- A Public Enter the total number of children enrolled (not beyond grade 12) in public schools operated by the reporting LEA.
- <u>B Non-Public</u> Enter the total number of children residing in the respondent's district who were enrolled in non-public schools regardless of the location of such schools.
- C Not Enrolled Enter the total number of children residing in the respondent's district who were not enrolled in any school, but who were of an age appropriate to attend schools in that district.

- Item 13 Total Number of Children Who Participated in Title I Program by Regular and Summer School Terms Enter the number of children (from the total number reported in item 12 above) who participated in regular school term projects in item "13A" and the number who participated in summer school term projects by grade span in item "13B". In cases where a child participated in both regular and summer term projects, count the child twice, once for regular school, and again for summer school, in order to report total participation by school terms.
- Item 14 Number of Children Who Participated in Title I Program by Type of Project Service Area and Estimated Cost of Each Area.
- Columns (1), (2), (3) and (4) Total Children (Public, Non-Public and Not Enrolled) Enter total number of children who received services under Title I according to the service areas designated on lines "A" through "K". Include all children regardless of their regular school enrollment status. Count each child as many times as applicable, but only once for any one service area
- Column (5) Non-Public Schools Only Enter the number of children from the total number of children reported in columns 1, 2, 3, and 4 who participated in project activities in a particular service area and who were regularly enrolled in non-public schools.
- Column (6) Total Operating Cost Prorated to Each Service Area Enter the estimated dollar amount of Title I funds expended for each service area reported in items "A" through "K". This amount should reflect as accurately as possible all costs including staff, supplies, equipment, etc. (See note below on item 15 column 6.)
- Item 15 Number of Children in Title I Program by Instructional Area and Estimated Cost of Each Area.
- Columns (1), (2), (3) and (4) Total Children (Public, Non-Public and Not Enrolled) Enter total number of children who participated in Title I project activities in the instructional areas designated in items "A" through "P". Include all children regardless of their regular school enrollment status. Count each child once for each instructional area in which he participated.
- Column 5 Non-Public Schools Only Enter the number of children from the total number of children reported in columns 1, 2, 3, and 4 who participated in project activities in a particular instructional area and who were regularly enrolled in non-public schools.
- Column 6 Total Operating Cost (Title I only) Pro-rated to Each Instructional Area Enter the estimated dollar amount of Title I funds expended for each instructional area reported in items "A" through "P". This amount should reflect as accurately as possible all costs, including staff, supplies, equipment, etc. Note: The total dollar amount for column 6 in items 14 and 15 must equal the total for all of item 23.

- Item 16 Total Number of Children by Racial and Other Characteristics of Children Who Participated in Title I Program Enter the numbers of children by race and special characteristics as indicated.
- Item 17 Number of Staff Members Who Received In-Service Training and Cost of Such Training Enter number of staff members by type of assignment, who actually received in-service or pre-service training under Title I projects. Enter the total estimated, or actual cost, of all such training in item "F" for professional and non-professional members listed in items "A" through "E".
- Item 18 Total Number of Volunteers Engaged in Title I Program Enter the total number of unpaid volunteers who performed services in the operation of projects by type of assignment in items "A" and "B".
- Item 19 Total Number of Parents Who Received Instructions or Services under Title I Program Enter the number of parents who (in connection with their children's participation in projects) received instruction, training, or other services. Do not include in this item the number of parents who participated solely as staff members. Count each such parent only once.
- Item 20 LEA Maximum Basic Grant Enter the amount of the maximum basic grant for fiscal year 1966 as determined by the State educational agency.
- Item 21 Average Expenditure Per Pupil (1964-65) Enter the current expenditure per pupil in average daily attendance in the district of the reporting local educational agency.

Item 22 - Title I Funds Approved.

- <u>A For Reporting LEA Enter the total dollar amount approved for the reporting local educational agency for all local projects under its Title I program for fiscal year 1966.</u>
- B From Cooperating LEA's Enter the total dollar amount contributed by other LEA's, if any, for cooperative projects administered by the reporting local educational agency.
- <u>C To Other LEA's</u> Enter the total dollar amount contributed by the reporting LEA for cooperative projects operated by <u>other</u> local educational agencies.
- <u>D Total Amount Approved for This Program Enter the net dollar</u> amount approved for Title I Program (A + B C = D) administered by the reporting local educational agency.
- Item 23 Funds Expended for Project Operation This item is for reporting actual expenditures of Title I funds. Round all amounts to the nearest dollar. Enter the actual dollar amount of Federal funds expended for all project activities and services by (a) salaries, (b) contracted services, (c) equipment, (d) textbooks, (e) rental of school facilities and (f) other operating costs. If necessary estimate the amount for item (d), textbooks.

Item 24 - Funds Expended for Construction - Enter the actual dollar amount of Title I funds expended for construction of school facilities, including remodelling and equipment items covered by the construction budget. Do not include any minor remodelling or equipment costs covered by the operating budget.

NOTE: For item 23 and 24, "Expenditures" includes disbursements plus unliquidated obligations to be paid as of August 31, 1966.

- Item 25 Total Number of Staff Positions Actually Filled, Total Salaries and Number of Unfilled Positions by Type of Assignment.
- Column (1) Number of Positions Filled From Regular Staff Enter by Title I activity assignment the total number of regular staff positions filled by personnel who received extra pay from Title I funds. Count each position once regardless of the number of individuals who may have filled it during the year.
- Column (2) Number of Positions Filled for Title I Program Only Enter by type of assignment the total number of staff positions filled by personnel who received salary payments solely from Title I funds. Count each position only once.
- Column (3) Unfilled Positions Enter by type of assignment the total number of positions approved but not filled.
- Column (4) Total Salaries Paid For each type of assignment enter the total dollar amount paid for salaries of staff members for positions reported in columns (1) and (2).
- Item 26 Outstanding Features and Accomplishments to the 1966 Title I Program This is an "optional" item of information.
